DIGITAL & AI MATURITY ASSESSMENT · THE APP

The App that speeds up your assessment and proves every score

The assessment measures your maturity; the App, designed by François Tessier, speeds up the analysis. It turns your interviews with your stakeholders into a 1-to-5 index: AI reads, quotes, cross-checks and verifies every answer; François validates every score.

6 dimensions **36** questions **4** analysis passes per interview **1** overall index, with its confidence level

WHAT THE APP CHANGES FOR YOU

Faster: a single round

Self-assessment and workshops merge into one series of interviews. AI tailors the questions to your context and processes the transcripts: your index arrives sooner.

More accurate: every score is proven

Every 1-to-5 score points to a quote verified word for word. A claim your documents don’t confirm is flagged, and its score can drop one level.

All your stakeholders, heard

Frontline staff often miss the technical debt IT knows well. The App weighs viewpoints against each other and against your documents, instead of averaging them.

AI proposes, François decides

The App calculates averages, the index and gaps to target precisely and reproducibly. Every contradiction becomes a question; only the score François signs off on counts.

What you get

- Your overall index and its confidence level
- Your six-dimension profile, 18-month target
- The hidden angle and your priority projects
- A full report and an executive summary
